PROFILE

Full Stack Web Developer and AI Engineer with experience in developing dynamic and scalable web applications, along with AI-driven solutions having for **more than 6 years**. Knowledge in modern frameworks like **Laravel, React, and Vue.js**. Strong back-end and front-end foundation with deep insight into state management. Delivered more than **15 full-stack projects** that improved system efficiency and enhanced user experiences by optimizing the front-end and back-end architecture. Also have expertise in deploying variety of AI technologies using python like **chatbots, text-to-speech, and voice cloning**, which drive automation and improved client's engagement.

PROFESSIONAL EXPERIENCE

Full Stack Development Team Lead

Jan 2024 – Present
Riyadh, Saudi Arabia

Company: Start with us

Projects:

- swu.sa
- skybridge.sa
- mcs.sa

Roles and Responsibilities:

- Led the end-to-end development of multiple projects, taking them from concept to production within planned timelines.
- Collaborated directly with clients to gather requirements, discuss potential solutions, and ensure project alignment.
- Implemented multi-tenancy architecture with multiple databases using Tenancy for Laravel package and wildcard domain configurations to automate onboarding for new clients requesting the same POS product.
- Built and customized admin dashboards using Filament, implementing role-based access control with Filament Shield (spatie/laravel-permission) for secure, scalable user management.
- Managed a team of developers by assigning daily tasks, monitoring progress, and ensuring timely delivery.
- Oversaw deployment processes by integrating GitHub with cPanel via SSH, managing code pushes from the terminal, and pulling updates directly to the server.
- Configured hosting environments, linked custom domains, and deployed client websites to live production servers.
- Integrated HyperPay Payment API to enable secure online transactions within client applications.
- Implemented ZATCA Phase 2 compliance for e-invoicing, including automated invoice generation and QR code embedding as per Saudi regulations.

Other Skills

- Microsoft Office (Word, Excel, PowerPoint)
- WordPress (application & plugin development)
- Shopify (store setup & customization)
- Web Scraping (data extraction & automation)
- cPanel & Hosting Management
- Git & GitHub (version control)
- API Integration (payment gateways, third-party services)
- AWS (S3, EC2)
- Deployment & Server Management (Linux-based hosting, SSH)

LANGUAGES

- English – Professional
- Arabic – Basics
- Urdu – Bilingual

REFERENCES

Available upon request

Frontend Developer

Oct 2023 – Dec 2023
Riyadh, Saudi Arabia

Company: Aiyah

Project:

- aiyah.ai

Roles and Responsibilities:

- Developed 100% dynamic UI using React.js and TypeScript
- Implemented Redux Toolkit for better state management, which resulted in reduction of components re-rendering, hence increasing the speed of page loading and the smoothness of UI.
- Utilized Ant design UI library for smooth and faster development.

Full-stack Developer

Oct 2019 – Oct 2023
Multan, Pakistan

Company: Cybrify

Projects:

- pricemate.info
- martinmobiles.com
- walc.io
- instantmobilefix.co.uk
- meroestream.com
- davenportmasjid.org

Roles and Responsibilities:

- Developed 10+ full-stack web applications using Laravel for the backend and Vue.js/React.js for the frontend.
- Built and optimized RESTful APIs to seamlessly integrate React and Vue frontends with Laravel backends.
- Independently managed 5+ projects from inception to deployment, consistently meeting deadlines and client requirements, achieving a 95% project success rate.
- Participated in Agile Scrum meetings to identify development challenges, propose solutions, and ensure smooth project progress.
- Mentored junior developers in modern frameworks such as Laravel, React, and Vue, assigning tasks and guiding them through the development process.
- Deployed applications on various hosting platforms including Hostinger, GoDaddy, cPanel, and Linux-based servers, ensuring smooth production launches.
- Implemented code optimization and database query improvements, reducing page load times and enhancing user experience.
- Resolved complex bugs and implemented preventive measures, ensuring long-term system stability.
- Added payment gateway integrations and other third-party APIs based on project requirements, ensuring secure transactions and extended application functionality.
- Built AI-powered tools such as chatbots and voice cloning applications, integrating them into websites to enhance user engagement and automation.
- Applied version control best practices with Git, ensuring clean, maintainable code and efficient team collaboration.
- Conducted thorough testing and quality assurance, delivering stable, production-ready applications.
- Designed and developed custom WordPress applications and WordPress plugins, extending site functionality and meeting specific client requirements.

Training & Certifications

- NATIONAL FREELANCE TRAINING PROGRAM (Technical Domain)
- Web development with Laravel, React.js, and Inertia
- Web development with Statamic
- Agile Project Management (by Google)

EDUCATION

Bachelor of Science in Information Technology

University of Education Lahore, Pakistan

ACHIEVEMENTS

- Implemented multi-tenancy architecture with automated onboarding, reducing setup time for new clients by over 99%.
- Integrated HyperPay Payment API and ensured ZATCA Phase 2 compliance for e-invoicing, meeting all Saudi regulatory requirements for both simplified as well as standard invoices, credit and debit notes.
- Delivered 15+ Laravel + Vue.js/React.js full-stack applications, achieving a 95% project success rate.
- Managed and mentored development teams, improving productivity and reducing bug rates through structured code reviews and Agile practices.
